

WEST MIDLANDS FIRE AND RESCUE AUTHORITY

13 FEBRUARY 2023

1. BUDGET AND PRECEPT 2023/2024 AND BUDGET FORECAST 2024/2025 TO 2025/2026

Joint Report of the Treasurer and Chief Fire Officer.

RECOMMENDED

THAT the following be approved:

- 1.1 The Authority's Net Revenue Budget for 2023/2024 of £119.109 million which includes a Council Tax requirement of £53.864 million, set out in Appendix A, together with the associated precept levels, set out in Appendix B, resulting in a Band D Precept increase of £4.99 (7.3%).
- 1.2 The Authority's capital programme for 2023/2024 to 2025/2026 as set out in Appendix E.
- 1.3 The Authority's Treasury Management Strategy which includes the Minimum Revenue Provision Statement set out in Appendix F and the Prudential Indicators in Appendix G.

2. PURPOSE OF REPORT

- 2.1 The Authority is requested to consider the Capital Programme for 2023/2024 to 2025/2026, the prudential indicators relating to the Authority's capital financing requirements, the Minimum Revenue Provision Statement, the Treasury Management Strategy, the Revenue Budget and to approve the consequent precept level and resultant amount for each constituent District Council.

3. BACKGROUND

- 3.1 The budget setting process is a key part of the Fire Authority's arrangements which establishes the anticipated level of available funding to deliver its key priorities and services. Work has been undertaken throughout the year to determine the Authority's key

priorities, outcomes and strategic objectives contained in the 'Three Year Rolling Strategy 2023-26 and Annual Plan'.

- 3.2 On 19 December 2022, the Secretary of State for the Department for Levelling Up, Housing and Communities (DLUHC) announced the provisional settlement for 2023/24 at £56.867m, resulting in a funding increase of £3.277m (6.1%). In addition, it was indicated the Services Grant would continue to be distributed through the existing Settlement Funding Assessment formula in 2023/24 amounting to approximately £1.4M for this Authority (£2.3M in 2022/23). The Government also proposed a general Council Tax referendum threshold of 3% for Fire and Rescue Authorities. However, for one year only (2023/24), for all Fire and Rescue Authorities, there would be flexibility to increase Band D precepts by £5.
- 3.3 The Local Government Finance Settlement is a one year only Settlement for 2023/24, rather than the anticipated two-year Spending Review period. Multi-year settlements are a more effective way of managing resources, aligned to longer term planning and this uncertainty needs to be factored into the Medium Term Financial Strategy.
- 3.4 The Fire Authority's provisional budget position was presented at the District Leaders meeting on 25 January 2023. The District Leaders were supportive of the Fire Service and specifically indicated they supported Council Tax for Band D properties being increased by £4.99 in line with the referendum limit that applies to this Authority.
- 3.5 Fire Authority Members received an overview of the provisional 2023/24 Finance Settlement as part of the Policy Planning Forum on 30 January 2023.
- 3.6 On 6 February 2023, DLUHC confirmed the Authority's 2023/24 Financial Settlement.
- 3.7 The Corporate Risk Register has identified a number of major risks that would seriously affect the Authority's ability to carry out its functions. The very nature of the risks have made it extremely difficult to quantify any funding impact that would arise were the risk to materialise and in the short term would result in a demand on the Authority's General Balances, which are identified in Section 6 of this report.

- 3.8 In addition, there are ongoing budget uncertainties, particularly Firefighter pension related issues, that have significant funding implications but at this stage still remain unclear in terms of ongoing cost and whether those costs will need to be found by Fire and Rescue Authorities and/or by Government funding.
- 3.9 Furthermore, there are significant budget pressures affecting the Authority arising from the 'Cost of Living' crisis, particularly pay awards and inflation levels.
- 3.10 Therefore, whilst the Government funding allocation in 2023/24 is an increase in cash terms compared to 2022/23, a high level of caution still needs to be applied to future financial years as the funding position and expenditure position remains volatile for the Fire Sector.
- 3.11 Details of the proposed 2023/24 budget are set out in Appendix A, together with revisions to the current year's budget (the 2023/24 budget is replicated for information in the management reporting format in Appendix C). It should be noted that to achieve a balanced budget in 2023/24, based on the funding allocations received and the expenditure levels estimated, in-year service efficiencies of £1.1M will be required.

Business Rates Retention

- 3.12 The Business Rates Retention Scheme was introduced in April 2013 and provides a direct link between business rates growth and the amount of money local authorities have to spend on local people and services. Local Authorities are able to keep 50% of the business rates revenue, adjusted for any growth or reduction on the revenue that is generated in their area. This is intended to provide a strong financial incentive for Authorities to promote economic growth.
- 3.13 The main impact on this Authority is that a proportion of income previously paid by the Government is received via the seven West Midlands Metropolitan Councils. Under these arrangements this Authority is entitled to a payment equivalent to 2% of the amount of Business Rates retained by the seven West Midlands Councils. This is approximately £10m.
- 3.14 In 2015, the Government indicated an intention to localise 100% of business rates to local authorities. This intent was modified to 75% as part of the provisional settlement for 2019/20. However, in November 2021, the Government's Communities Secretary announced that the

75% business rates retention approach would conflict with the Government's 'levelling up agenda' and that the Government would now look at the mechanism for redistributing funding to those Authorities most in need, effectively appearing to abandon plans to allow councils to retain 75% of their business rates.

Fair Funding Review

- 3.15 The Government considered the need for a 'Fair Funding Review' a number of years ago. The outcome of such an exercise would affect how funding is allocated and redistributed between local authorities and was originally intended to determine the relative share received by each individual Fire and Rescue Authority from the total Fire Service funding received from Central Government.
- 3.16 It is now the Government's intention to undertake a Fair Funding Review across Local Authorities but not to include Fire and Rescue Authorities. On 12th December 2022 DLUHC publishes a Local Government Policy Statement for 2023/24 and 2024/25 which indicated implementation of the Fair Funding Review was delayed until 2025/26 at the earliest. Whilst it is not intended for the Fire Sector to be directly part of the exercise, issues such as the scale of Council Tax revenue generated by individual Local Authorities could have an indirect impact on resource allocations within the Fire Sector and so this review adds another complexity and volatility to long term financial planning.

Three Year Rolling Strategy 2023-26 and Annual Plan 2023-24

- 3.17 A key element of developing the Authority's plans is to seek the opinions of those people that live, work and travel within the West Midlands. As part of this, a public consultation is undertaken every three years and/or when changes to the core services are being considered by the Authority.
- 3.18 The Authority consulted the public in 2020. This provided the opportunity for the public to influence the way the Service works. The Community Safety Strategy (the Community Risk Management Plan) is the risk analysis which identifies what the risk profile of the West Midlands community is and provides analysis of where resources are required to enable effective management of these risks in order to achieve a five-minute risk-based attendance standard for the most serious emergencies.

- 3.19 The 'Three Year Rolling Strategy 2023-26 and Annual Plan' sets the Authority's strategic direction for the next three years and defines those outcomes, priorities and strategic objectives, for the first year, which are to be provided with the available resources in 2023/24 and forecasted in future years.

Firefighters' Pension Scheme – Employers' Contributions

- 3.20 HM Treasury announced changes to the discount rate for unfunded public sector pensions on 6 September 2018. This, combined with the earlier 2016 Budget announcement, resulted in a reduction to the discount rate from 3% to 2.4%, and had the effect of increasing the employer contributions (to include ill-health costs) from an average 17.6% to 30.2% from April 2019.
- 3.21 The Government Actuary's Department estimated that the additional cost to the Fire sector would be around £125m per annum. However, HM Treasury provided additional funding in 2019/20 in order to mitigate most of this increase, with the sector paying only the additional costs announced at the Budget 2016 (a reduction in the discount rate from 3% to 2.8%). This meant that the Fire sector paid approximately £10m of the additional costs in 2019/20, with the remaining £115m being provided via a grant under the s31 Local Government Act 2003.
- 3.22 For this Authority, a Section 31 Government grant was allocated in 2019/20, with a similar arrangement being made subsequently in 2020/21, 2021/22 and 2022/23. It was anticipated that this matter would be considered within the base funding for the Fire Sector from 2022/23 to avoid the uncertainty around funding and the one-year only funding arrangement. However, this has not happened to date although a Section 31 grant of £5.7M is anticipated for 2023/24.

Firefighters' Pension Scheme – Court of Appeal Judgement

- 3.23 On 20 December 2018, the Court of Appeal handed down the judgement in the Firefighters' transitional appeals case, finding that the transitional protections introduced with the new Pension scheme in 2015 were unlawfully discriminatory on grounds of age.
- 3.24 The decision related only to the transitional protection arrangements in the 2015 firefighters' pension scheme that applied to members of the 1992 Firefighters' Pension scheme and whether these were discriminatory. It did not address the introduction of that scheme

itself by the primary legislation of the Public Service Pensions Act 2013.

- 3.25 On 18th December 2019 the Employment Tribunal issued an interim Order which provided claimants with a right to be treated as if they had met the criteria for full protection under the scheme rules. Following the Publication of this Order, the Government made a written statement and launched a Consultation on removing the discrimination from all Public Service Pension Schemes. The consultation closed on 11th October 2020 and the Governments response was published on 4th February 2021.
- 3.26 The response proposed that scheme members with benefits in the legacy schemes, those that existed before 1st April 2015, should have the opportunity to have their benefits calculated as if their membership of those schemes had continued until 31st March 2022. From 1st April 2022 all employees were moved into the reformed pension scheme. In the case of Firefighters, this was the 2015 Firefighters' Pension scheme.
- 3.27 However, the situation regarding 'Immediate Detriment' cases i.e. those staff affected by the introduction of the new Pension scheme in 2015, is still affected by a number of legal and financial uncertainties and it is not anticipated that all of the associated legal and tax regulations will be in place until October 2023. Due to these timescales and the associated ongoing unfair treatment of individuals affected by Immediate Detriment, the Audit and Risk Committee on 6th June 2022 resolved to make payments prior to October 2023, with the illustrative costs to be funded from General Reserves. Because of the legal and financial uncertainties associated with this matter, this still represents another complexity to the Authority's pension and budgetary considerations.

4. **PRECEPT 2023/2024**

- 4.1 Under the Council Tax arrangements, the allocation of the total sum required by the Authority between constituent District Councils is based on the relevant tax base for each District.
- 4.2 All District Councils have now formally set their Council Tax base and have notified the Authority accordingly. The total relevant Council Tax base for the Authority is 737,707.31 (726,271.98 in 2022/23).
- 4.3 For 2021/22 budget setting the Government amended secondary legislation to allow Authorities to spread the estimated deficit on the

2020/21 Collection Fund over the three years 2021/22 to 2023/24, following concerns that spending on local services could be significantly curtailed and/or Authorities' financial viability put at risk in 2021/22. For this Authority, the spread of the deficit was £272k in 2021/22, £169k in 2022/23 and £169k in 2023/24.

- 4.4 The District Councils have now confirmed their Council Tax surplus/deficits for 2022/23 which has resulted in an overall surplus for this Authority of £1.222m. As a result, the total surplus to be considered for the 2023/24 budget funding arrangements is £1.053m.
- 4.5 The appropriate precept has now been calculated for each District and is set out in Appendix B, paragraph 1.4, for the Authority's approval.
- 4.6 The Council Tax at Band D for 2023/24 would be £73.02, an increase of £4.99 (7.3%) per annum.

5. **FUNDING OF EXPENDITURE 2023/2024**

The figures from external funding sources are shown in the Table below:

	£000
Core Funding	56,867
Section 31 Grant	5,961
Services Grant (2023/24)	1,364
Share of Collection Fund Surplus/(Deficit)	1,053
Council Tax	53,864
Net Revenue Budget	119,109

In addition to external funding, it is estimated that the Authority will generate income of £3.387m (£3.054m in 2022/23) (Appendix D). The 2023/24 budget does not assume the use of any general balances.

6. **GENERAL BALANCES STRATEGY**

- 6.1 Based on the current forecast of net expenditure in 2022/2023, the Authority's General Balances at 1 April 2023 would be approximately £3.9 million. At this level, the amount of General Balances would equate to approximately 3.2% of the Authority's 2023/2024 Net Revenue Budget. The actual level of General Balances at 1 April

2023 will not be determined until the completion of the Authority's 2022/23 closedown of accounts process.

- 6.2 As part of considering the Authority's 2023/24 budget, following notification of the core funding settlement, the overall funding does not require the use of General Balances to support the Net Revenue Budget requirement. This would therefore result in the Authority's available General Balances remaining at approximately £3.9 million by the end of 2023/2024 .
- 6.3 The funding settlement for 2023/24 is a one year only arrangement. There is no clarity over funding levels, nationally and/or locally, after that date which hampers meaningful financial planning over the longer term.
- 6.4 Additional potential budget pressures, e.g. anticipated increases in firefighter pension employer rates, pay award demands, high levels of inflation, uncertainty around Government funding from 2024/25 onwards and a lack of any direct capital and transformation funding being available, means that the estimated level of General Balances of approximately £3.9 million by the end of 2023/24 is considered appropriate given the issues highlighted.

7. **CAPITAL PROGRAMME**

- 7.1 At the Authority meeting on 14 February 2022, consideration and approval was given to the current three-year Capital Programme. The Programme has been monitored during the year at Authority meetings.
- 7.2 It is estimated that commitments in respect of those projects which make up the proposed capital programme are as follows:

	£m
2023/2024	9.191
2024/2025	6.255
2025/2026	4.377

The full list of projects is shown on Appendix E. It should be noted that the figures reflected against the Vehicle Replacement Programme are based on the current fleet profile and operational life cycles and it is anticipated that a review of these provisions will be required following the completion of the 'Blended Fleet' workstream within the Community Risk Management Plan objectives.

- 7.3 The Table below compares the expenditure on those projects within the capital programme which are committed against a forecast of projected resources for the period 2023/24 to 2025/2026.

	2023/24 £m	2024/25 £m	2025/26 £m
Capital Receipts	2.749	-	-
Capital Grants	-	-	-
Revenue Funding	6.442	-	-
Total Capital Resources	9.191	-	-
<u>Less: Commitments</u>	9.191	6.255	4.377
Funding Surplus/(Deficit)	-	(6.255)	(4.377)

- 7.4 At the time of announcing the funding settlement for 2023/24, no specific allocations have been made by the DLUHC in relation to capital funding. The lack of any specific capital funding allocations continues to be an issue for the Fire Sector which central Government have been asked to address.
- 7.5 The Authority's capital programme has predominantly been funded by earmarked reserves in recent years and this continues to be the case for 2023/24 . However, it needs to be highlighted that at this stage there is a deficit in the capital programme in 2024/25 and 2025/26, summarised in the above Table.

8. **TREASURY MANAGEMENT AND THE PRUDENTIAL CODE**

- 8.1 The Fire Authority recognises the importance of Treasury Management to the economy and efficiency of its finances. It also recognises that delivering quality services in this area requires expertise and skills that can best be provided by specialist professions from external organisations.
- 8.2 West Midlands Fire Service's Treasury Management functions are provided by Sandwell MBC who have in turn appointed external advisors to support them. The Fire Authority has also linked its appointment of bankers to that of Sandwell MBC in order to benefit from efficiencies in tendering, cash flow management and investment.
- 8.3 The Treasury Management Strategy for 2023/24 is set out in Appendix F.
- 8.4 Under the Local Government Act 2003, credit approvals were abolished, and a new prudential capital finance system was introduced from 1 April 2004. CIPFA has prepared a Prudential Code which underpins the system of capital finance. Local authorities are required by Regulation to have regard to the Prudential Code under Part 1 of the Local Government Act 2003.
- 8.5 The key objectives of the Prudential Code are to ensure that the capital investment plans of the Authority are affordable, prudent and sustainable. A further key objective is to ensure that treasury management decisions are taken in accordance with good professional practice and in a manner that supports prudence, affordability and sustainability.
- 8.6 To demonstrate that local authorities have fulfilled these objectives, the Prudential Code sets out the indicators that must be used and the factors that must be taken into account. The indicators are designed to support and record local decision making.
- 8.7 The Prudential Indicators that have been calculated for this Authority are detailed on Appendix G.

9. **PLANNING FOR THE 2024/2025 TO 2025/2026 BUDGET**

- 9.1 In preparing the draft revenue budget for 2023/2024, an expenditure forecast for 2024/2025 to 2025/2026 has also been undertaken by “rolling forward” the 2023/24 draft budget; updating for specific known budget pressures, anticipated inflation and pay awards, adding in commitments, adjusting for anticipated staff turnover levels, setting efficiency targets, etc. (Appendix H).
- 9.2 The funding settlement for 2023/24 is a one year only arrangement and in the Secretary of State for DLUHC settlement announcement there was no indication of further funding levels beyond 2023/24. In planning for the 2024/25 budget, an increase of 2% has been reflected in the overall core funding and a further 2% in 2025/26. It should be noted that this is a very provisional figure and there is the potential for the scale of increases to be greater than this base assumption (or that reductions may apply). Every 1% increase/reduction in core funding represents an impact of circa £0.570m funding for the Authority.
- 9.3 A summary of the impact of the indicated increases in core funding is shown in the table below:

Estimated position based on the financial settlement for core funding for 2023/24 and an increase of 2% in 2023/24 and 2024/25 (with a Band D Council Tax increase of £4.99 (7.3%) in 2023/24 and 3% in 2024/25 and 2025/26)

	2023/24 * £m	2024/25 £m	2025/26 £m
Net Budget Requirement	119.109	120.500	123.918
Core Funding	56.867	58.004	59.164
Section 31 Grant	5.961	5.961	5.961
Services Grant	1.364	-	-
Council Tax	53.864	56.035	58.293
Council Tax Surplus/(Deficit)	1.053	500	500
Available Resources	119.109	120.500	123.918
Budget Surplus/(Deficit)	-	-	-

* To set a balanced budget of £119.109M in 2023/24 requires efficiency savings of £1.1M

10. **ROBUSTNESS OF THE BUDGET PREPARATION AND ADEQUACY OF RESERVES**

- 10.1 In accordance with the Local Government Act 2003 (S25-S27) and to comply with CIPFA guidance on local authority reserves and balances, the Treasurer is required to formally report to members on the robustness of the budget and the adequacy of reserves.
- 10.2 The budget presented to the Authority has been prepared using reasonable and appropriate estimation techniques for both expenditure and income. The budget process is such that all financial pressures faced by the Authority have been considered and resources allocated as appropriate to fulfil the priorities of the Authority. Where resources have not been allocated to identified pressures either; the pressure has been absorbed into the existing budget or the risk associated with not meeting the pressure has been evaluated and appropriate action taken. The robustness of the budget preparation undertaken by the Authority is therefore considered satisfactory.
- 10.3 The appropriate level of reserves and provisions has been assessed and determined using a variety of mechanisms, including:
- The budget setting process, the annual financial cycle and contributions from the strategic leadership of the organisation.
 - Considering the budget at various stages of construction including the reasonableness of the key budget assumptions such as estimates of inflationary and corporate financial pressures, realism of income targets and the extent to which known trends and liabilities are provided for.
 - Review of the movements, trends and availability of contingencies, provisions and earmarked reserves to meet anticipated and unforeseen cost pressures in the context of future pressures and issues.
 - The use of professional experience and best professional judgement.
 - The use of appropriate professional, technical guidance and local frameworks.
 - Knowledge of the Officers involved in the process, particularly finance professionals, including their degree of experience and qualifications.

- Review of the strength of financial management and reporting arrangements including internal control and governance arrangements.
- 10.4 The Authority's aim is to have a prudent level of General Balances informed by an assessment of potential risks to the organisation. The level of General Balances at the end of the financial year 2021/22 was approximately £3.9m, 3.2% of the Authority's 2023/24 net budget requirement. This level of balances is considered appropriate at this stage due to the assumptions for core funding in future years, volatility of Council Tax collection rates and the absence of capital and transformation funding available to the Authority.
- 10.5 It was deemed that a prudent level of earmarked reserves was established during the Authority's 2021/2022 closedown exercise. A review of these reserves will be undertaken as part of the Authority's 2022/2023 closedown of accounts process.
- 10.6 Based on known circumstances and financial risk assessments, it is felt that adequate earmarked reserves and provisions were created to meet legal and expected liabilities, as at 31 March 2022. A list of the reserves and the intended strategy for their use in future years is provided in Appendix J.
- 10.7 Consideration will be given to the appropriate level of reserves required as at 31 March 2023 as part of the Authority's closedown of accounts process.
- 10.8 In recommending an adequate level of reserves, consideration is given to the opportunity costs of maintaining particular levels of reserves and balances and compares these to the benefits accrued from having such reserves. The opportunity cost of maintaining a specific level of reserves is the 'lost' opportunity, for example, of investing elsewhere to generate additional investment income or using the funds to invest in service improvements. In assessing this, it is important to consider that reserves can only be used once and are therefore potentially only 'one-off' sources of funding. Therefore, any use of general reserves is only ever used on one-off items of expenditure and/or to assist transformational change. The level of reserves is also determined by use of a comprehensive risk assessment to ensure they represent an appropriately robust 'safety net' which adequately protects against potential unbudgeted costs.

- 10.9 The current level of reserves is considered to be sufficient in all but the most unusual and serious combination of possible events. In this context it is considered that the current level of reserves presents an optimum balance between risk management and opportunity cost. This maintains a suitable and sustainable level of reserves, which include ensuring sound governance and financial stability in the short and longer term.
- 10.10 Best endeavours have been made to ensure that the budget and reserves are adequate using the information available at this date. The budget has been constructed with a professional policy led medium term strategic framework using appropriate assumptions, linking investment and spending to key priorities and having undertaken a comprehensive assessment of risk.
- 10.11 The forecast budget for 2024/25 and 2025/26 shows a balanced budget. As stated earlier, it may be that the scale of funding will vary. In addition, given the number of issues that could have a significant impact on the Authority's budget position over the period of the medium term financial plan i.e.; future Government funding allocations to the Fire Sector, the treatment of firefighter pension related issues, pay award/inflation pressures and the indicative deficit in year's two and three of the capital programme, the need for and scale of budget savings required over the period of the medium term financial plan needs to be kept under review.

11. EQUALITY AND DIVERSITY IMPLICATIONS

- 11.1 In preparing this report an initial Equality Impact Assessment is not required and has not been carried out because the matters contained in this report will not lead to and/or do not relate to a policy change.

12. LEGAL IMPLICATIONS

- 12.1 The course of action recommended in this report does not raise issues which should be drawn to the attention of the Authority's Monitoring Officer.

13. ENVIRONMENTAL IMPLICATIONS

- 13.1 There are no environmental implications.

NET REVENUE BUDGET	108,303	108,303	119,109

WEST MIDLANDS FIRE AND RESCUE AUTHORITY**BAND D PRECEPT INCREASE OF £4.99 (7.3%)**

- 1.1 THAT it be noted that the constituent District Councils have formally set their Council Tax bases for the year 2023/2024 in accordance with Regulation 3 of the Local Authorities (Calculation of Council Tax Base) Regulations 1992 made under Section 33(5) of the Local Government Finance Act 1992 as follows:

	Tax Base
Birmingham	263,262.00
Coventry	86,075.20
Dudley	93,834.60
Sandwell	76,764.73
Solihull	79,168.00
Walsall	72,608.66
Wolverhampton	65,994.12
	<u>737,707.31</u>

- 1.2 THAT the following amounts be now calculated by the Authority for the year 2022/2023 in accordance with Sections 40 to 48 of the Local Government Finance Act 1992:

- 1.2.1 **£134,825,000** being the aggregate of the amounts which the Authority estimates for the items set out in Section 42A(2)(a) to (d) of the Act.
- 1.2.2 **£80,961,080** being the aggregate of the amounts which the Authority estimates for the items set out in Section 42A(3)(a) to (b) of the Act.
- 1.2.3 £53,863,920 being the amount by which the aggregate at 1.2.1 above exceeds the aggregate at 1.2.2 above calculated by the Authority in accordance with Section 42A(4) of the Act as its council tax requirement for the year.
- 1.2.4 £73.02 being the amount at 1.2.3 above divided by the total amount at 1.1 above, calculated by the Authority in accordance with Section 42B(1) of the Act as the basic amount of its Council Tax for the year.

1.3	<u>Valuation Bands:</u>	£	£
		(to 6 decimals)	(rounded to 2 decimals)
	A	48.676866	48.68
	B	56.789677	56.79
	C	64.902488	64.90
	D	73.015299	73.02
	E	89.240921	89.24
	F	105.466544	105.47
	G	121.692166	121.69
	H	146.030599	146.03

being the amounts given by multiplying the amount at 1.2.4 above by the number which in the proportion set out in Section 5(1) of the Act is applicable to dwellings listed in a particular valuation band divided by the number which in that proportion is applicable to dwellings listed in valuation band D, calculated by the Authority in accordance with Section 47(1) of the Act, as the amounts to be taken into account for the year in respect of categories of dwellings listed in different valuation bands.

1.4	<u>Resultant precepts:</u>	£
	Birmingham City Council	19,222,154
	Coventry City Council	6,284,807
	Dudley MBC	6,851,361
	Sandwell MBC	5,605,000
	Solihull MBC	5,780,475
	Walsall MBC	5,301,543
	Wolverhampton City Council	<u>4,818,580</u>
	Total	<u>53,863,920</u>

being the amounts given by multiplying the amount at 1.2.4 above by the appropriate tax base at 1.1 above in accordance with section 48(2) of the Act, as the amount of precept payable by each constituent District Council.

- 1.5 THAT the precept for each District Council as calculated at 1.4 above be issued in accordance with Section 40 of the Local Government Finance Act 1992.

WEST MIDLANDS FIRE AND RESCUE AUTHORITY

TREASURY MANAGEMENT STRATEGY 2023/24

1.1 Background

The Authority is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties.

The second main function of the treasury management service is the funding of the Authority's capital plans. These capital plans provide a guide to the borrowing need of the Authority, essentially the longer term cash flow planning to ensure that the Authority can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured.

The contribution the treasury management function makes to the Authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

CIPFA defines treasury management as:

“The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

1.2 Reporting Requirements

1.2.1 Capital Strategy

The CIPFA 2021 Prudential and Treasury Management Codes require all local authorities to prepare a capital strategy, which will provide the following:

- a high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- an overview of how the associated risk is managed
- the implications for future financial sustainability

The aim of the capital strategy is to ensure that Members of the Authority fully understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite.

1.2.2 Treasury Management Reporting

The Authority is required to receive and approve the following main reports each year. These reports are required to be adequately scrutinised by the Audit and Risk Committee before being recommended to the Authority.

Prudential and Treasury Indicators and Treasury Strategy – This report covers:

- the capital plans (including prudential indicators);
- a Minimum Revenue Provision (MRP) Policy (how residual capital expenditure is charged to revenue over time);
- the Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and
- an investment strategy (the parameters on how investments are to be managed).

A Mid Year Treasury Management Report – This will update Members with the progress of the capital position, amending prudential indicators as necessary, and whether any policies require revision.

An Annual Treasury Report – This is a backward looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy.

1.3 Treasury Management Strategy for 2023/24

The strategy for 2023/24 covers two main areas:

Capital Issues

- the capital expenditure plans and the associated prudential indicators;
- the MRP policy.

Treasury Management Issues

- the current treasury position;
- treasury indicators which will limit the treasury risk and activities of the Authority;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- the policy on use of external service providers.

These elements cover the requirements of the Local Government Act 2003, DLUHC Investment Guidance, DLUHC MRP Guidance, the CIPFA Prudential Code and the CIPFA Treasury Management Code.

1.4 Treasury Management Consultants

The Authority's treasury management function is provided by Sandwell MBC who have appointed Link Group, Treasury solutions as its external treasury management advisors.

The Authority recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon Sandwell MBC and the external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, the treasury advisers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. Sandwell MBC will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

2. Capital Prudential Indicators 2023/24 – 2025/26

The Authority's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans are reflected in prudential indicators:

2.1 Capital Expenditure

This prudential Indicator (Appendix E) is a summary of the Authority's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle.

2.2 The Authority's Borrowing Need (the Capital Financing Requirement)

The second prudential indicator is the Authority's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Authority's indebtedness and so its underlying borrowing need. Any capital expenditure, which has not immediately been paid for, will increase the CFR, details are provided in Appendix G.

The CFR does not increase indefinitely, as the MRP is a statutory annual revenue charge which broadly reduces the indebtedness in line with each assets life, and so charges the economic consumption of capital assets as they are used.

2.3 Minimum Revenue Provision Statement

The Authority is required to pay off an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the minimum revenue provision - MRP), although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision - VRP).

DLUHC Regulations have been issued which require the full Authority to approve an MRP Statement in advance of each year. A variety of options are provided to Authorities, so long as there is a prudent provision. The Authority is recommended to approve the following MRP Statement

For all borrowing the MRP policy will be:

- **Asset Life Method** (Option 3) – MRP will be based on the estimated life of the assets, in accordance with the proposed regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction).

This option provides for a reduction in the borrowing need over approximately the assets life.

For 2015/16 onwards the proposed MRP policy has been amended to an Annuity basis which results in a reduction to the amount of revenue applied to provide for debt in the period 2015/16 to 2033/34 after which point the revenue applied increases compared to the current MRP approach through to 2054/55. The change does not increase the level of debt but means that the level of capital expenditure financed by borrowing, the Capital Financing Requirement will reduce more slowly in the earlier years as the amount of MRP is lower than the policy in 2014/15. However, the revised policy would ensure that the CFR would be repaid over a period of 40 years. If the current MRP approach continued there would be a balance outstanding of approximately £7m at the end of the 40-year period. It is not proposed to amend retrospectively any MRP recognised in previous years; this policy would apply from 2015/16 onwards.

In addition, the Authority can set aside amounts in excess of the minimum required. Consideration will continue to be given to more closely aligning external debt with the capital financing requirement by making a voluntary MRP contribution and/or using capital receipts. This would reduce the Authority's expenditure commitments in future years.

3. Treasury Management Strategy - Borrowing

The capital expenditure plans provide details of the activity of the Authority. The treasury management function ensures that the Authority's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this activity. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

3.1 Current Portfolio Position

Within the prudential indicators there are a number of key indicators to ensure that the Authority operates its activities within well defined limits. One of these is that the Authority needs to ensure that its gross debt, does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2023/24 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

The Authority complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this report.

3.2 Treasury Indicators: Limits to Borrowing Activity

The Operational Boundary. This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

2022/23 Estimate	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate
£37m	£36m	£35m	£33m

The Authorised Limit for External Debt. A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the Authority. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all Authority's plans, or those of a specific Authority, although this power has not yet been exercised.
2. The Authority is asked to approve the following Authorised Limits:

2022/23 Estimate	2023/24 Estimate	2024/25 Estimate	2025/26 Estimate
£40m	£39m	£38m	£36m

3.3 Prospects for Interest Rates

The Authority's Treasury Management functions are provided by Sandwell MBC who have appointed Link Asset Services as its treasury advisor and part of their service is to assist with formulating a view on interest rates. The following table and Appendix F1 gives Link Asset Services central view as at 19 December 2022.

Link Group Interest Rate View 19.12.22													
	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25
BANK RATE	3.50	4.25	4.50	4.50	4.50	4.00	3.75	3.50	3.25	3.00	2.75	2.50	2.50
3 month ave earnings	3.60	4.30	4.50	4.50	4.50	4.00	3.80	3.30	3.00	3.00	2.80	2.50	2.50

12 month ave earnings	4.70	4.70	4.70	4.50	4.30	4.20	4.00	3.50	3.20	3.10	3.00	2.70	2.70
5 yr PWLB	4.20	4.20	4.20	4.10	4.00	3.90	3.80	3.60	3.50	3.40	3.30	3.20	3.10
10 yr PWLB	4.30	4.40	4.40	4.30	4.10	4.00	3.90	3.80	3.60	3.50	3.40	3.30	3.30
25 yr PWLB	4.60	4.60	4.60	4.50	4.40	4.20	4.10	4.00	3.90	3.70	3.60	3.50	3.50
50 yr PWLB	4.30	4.30	4.30	4.20	4.10	3.90	3.80	3.70	3.60	3.50	3.30	3.20	3.20

Link Asset Services central forecast for interest rates was updated on 19 December 2022 and reflected a view that the MPC would be keen to further demonstrate its anti-inflation credentials by delivering a succession of rate increases. Bank Rate stands at 4% currently but is expected to reach a peak of 4.5% in 2023.

Further down the road, Link Asset Services anticipate the Bank of England will be keen to loosen monetary policy when the worst of the inflationary pressures are behind us, but that timing will be one of fine judgment: cut too soon, and inflationary pressures may well build up further; cut too late and any downturn or recession may be prolonged.

The CPI measure of inflation looks to have peaked at 11.1% in Q4 2022. Despite the cost-of-living squeeze that is still taking shape, the Bank will want to see evidence that wages are not spiralling upwards in what is evidently a very tight labour market.

In the upcoming months, Link Asset Services forecasts will be guided not only by economic data releases and clarifications from the MPC over its monetary policies and the Government over its fiscal policies, but the on-going conflict between Russia and Ukraine. (More recently, the heightened tensions between China/Taiwan/US also have the potential to have a wider and negative economic impact.)

On the positive side, consumers are still estimated to be sitting on over £160bn of excess savings left over from the pandemic so that will cushion some of the impact of the above challenges. However, most of those are held by more affluent people whereas lower income families already spend nearly all their income on essentials such as food, energy and rent/mortgage payments.

3.4 Borrowing Strategy

The Authority is currently maintaining an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Authority's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as medium and longer dated borrowing rates are expected to fall from their current levels once prevailing inflation concerns are addressed by tighter near-term monetary policy. That is, Bank Rate increases during 2022 and the first half of 2023.

Against this background and the risks within the economic forecast, caution will be adopted with the 2023/24 treasury operations. The Treasurer will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

Treasury Management Limits on Activity

There are three debt related treasury activity limits. The purpose of these are to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs/improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments
- Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates;
- Maturity structure of borrowing. These gross limits are set to reduce the Authority's exposure to large fixed rate sums falling due for refinancing and are required for upper and lower limits.

The Authority is asked to approve the following treasury indicators and limits:

	2023/24	2024/25	2025/26
Interest rate Exposures			
	Upper	Upper	Upper
Limits on fixed interest rates based on net debt	160%	160%	160%
Limits on variable interest rates based on net debt	30%	30%	30%
Maturity Structure of fixed interest rate borrowing 2023/24			
	Lower	Upper	
Under 12 months	0%	20%	
12 months to 2 years	0%	20%	
2 years to 5 years	0%	25%	
5 years to 10 years	0%	50%	
10 years and above	0%	90%	
Maturity Structure of variable interest rate borrowing 2023/24			
	Lower	Upper	
Under 12 months	0%	20%	

12 months to 2 years	0%	20%
2 years to 5 years	0%	25%
5 years to 10 years	0%	50%
10 years and above	0%	90%

3.5 Policy on Borrowing in Advance of Need

The Authority will not borrow more than, or in advance of, its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Authority can ensure the security of such funds.

Borrowing in advance will be made within the constraints that it will be limited to no more than 20% of the expected increase in borrowing need (CFR) over the three-year planning period. Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

3.6 Debt Rescheduling

Rescheduling of current borrowing in our debt portfolio is unlikely to occur as there is still a very large difference between premature redemption rates and new borrowing rates.

The reasons for any rescheduling to take place will include:

- the generation of cash savings and / or discounted cash flow savings;
- helping to fulfil the treasury strategy;
- enhance the balance of the portfolio (amend the maturity profile and/or the balance of volatility).

Consideration will also be given to identify if there is any residual potential for making savings by running down investment balances to repay debt prematurely as short term rates on investments are likely to be lower than rates paid on current debt.

All rescheduling will be reported to the Audit and Risk Committee through the mid-year or annual reporting mechanism.

3.7 New financial institutions as a source of borrowing and/or types of borrowing

Currently the PWLB Certainty Rate is set at gilts + 80 basis points for borrowing. However, consideration may still need to be given to sourcing funding from the following sources for the following reasons:

- Local authorities (primarily shorter dated maturities).
- Financial institutions (primarily insurance companies and pension funds).

Our advisors will keep us informed as to the relative merits of each of these alternative funding sources.

4 Annual Investment Strategy

4.1 Investment Policy

The Authority's investment policy has regard to the following:

- DLUHC's Guidance on Local Government Investments ("the Guidance").
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 ("the Code").
- CIPFA Treasury Management Guidance Notes 2021.

The Authority's investment priorities will be security first, portfolio liquidity second and then yield (return).

The guidance from DLUHC and CIPFA place a high priority on the management of risk. The Authority will adopt a prudent approach to managing risk and defines its risk appetite by the following means:

Minimum acceptable credit criteria are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings.

Further, the Authority's and Sandwell MBC's officers recognise that ratings should not be the sole determinant of the quality of an institution and that it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Authority and Sandwell MBC will engage with its advisors to monitor the market.

Other information sources used will include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

Investment instruments identified for use in the financial year are listed in Appendix F2 under the 'Specified' and 'Non-Specified' Investments categories. Counterparty limits will be as set through the Authority's Treasury Management Practices – Schedules.

4.2 Creditworthiness policy

The primary principle governing the Authority's investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle the Authority will ensure that:

- It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the Specified and Non-Specified investment sections below; and
- It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Authority's prudential indicators covering the maximum principal sums invested.

A counterparty list will be maintained in compliance with the following criteria. These criteria are separate to that which determines which types of investment instrument are either Specified or Non-Specified as it provides an overall pool of counterparties considered high quality which the Authority may use, rather than defining what types of investment instruments are to be used.

Credit rating information is supplied by the Link Group, treasury consultants, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating Watches (notification of a likely change), rating Outlooks (notification of a possible longer term change) are provided to Officers almost immediately after they occur and this information is considered before dealing. For instance, a negative rating Watch applying to a counterparty at the minimum Authority criteria will be suspended from use, with all others being reviewed in light of market conditions.

The criteria for providing a pool of high quality investment counterparties (both Specified and Non-specified investments) is:

- Banks 1 - good credit quality – the Authority will only use banks which:
 - i. are UK banks; and/or
 - ii. are non-UK and domiciled in a country which has a minimum sovereign long-term rating of AA+and have, as a minimum, the following Fitch, Moody's and Standard & Poor's (S&P) credit ratings (where rated):
 - i. short term – F1, P-1, A-1 (Fitch, Moody's and S&P) respectively
 - ii. long term – A, A1 and A (Fitch, Moody's and S&P) respectively
- Banks 2 – Part nationalised UK banks – Royal Bank of Scotland. This bank can be included provided it continues to be part nationalised or it meets the ratings in Banks 1 above.
- Banks 3 – The Authority's own banker for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time invested.
- Building Societies. The Authority will use all Societies which meet the ratings for banks outlined above.
- Money Market Funds – AAA rated
- UK Government (including gilts, Treasury Bills and the Debt Management Account Deposit Facility (DMADF))
- Local Authorities, Parish Authorities, CCLA, etc
- Housing Associations
- Supranational institutions

Use of additional information other than credit ratings

Additional requirements under the Code require the Authority to supplement credit rating information. Whilst the above criteria relies primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, negative rating Watches/Outlooks) will be applied to compare the relative security of differing investment opportunities.

Creditworthiness

Significant levels of downgrades to short- and long-term credit ratings have not materialised since the crisis in March 2020. In the main, where they did change, any alterations were limited to Outlooks. However, more recently the UK sovereign debt rating has been placed on Negative Outlook by the three major rating agencies in the wake of the Truss/Kwarteng unfunded tax-cuts policy. Although the Sunak/Hunt government has calmed markets, the outcome of the rating agency reviews is unknown at present, but it is possible the UK sovereign debt rating would be downgraded.

4.3 Country and sector considerations - Due care will be taken to consider the country, group and sector exposure of the Authority's investments. In part the country selection will be chosen by the credit rating of the sovereign state in Banks 1 above. In addition:

- no more than 25% will be placed with any non-UK country at any time;
- limits in place above will apply to a group of companies;
- sector limits will be monitored regularly for appropriateness.

4.4 Investment Strategy

In-house funds. Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months). Greater returns are usually obtainable by investing for longer periods. The current shape of the yield curve suggests that is the case at present, but there is the prospect of Bank Rate peaking in the first half of 2023 and possibly reducing as early as the latter part of 2023 so an agile investment strategy would be appropriate to optimise returns.

Investment returns expectations. The current forecast includes a forecast for Bank Rate to reach 4.5% in Q2 2023.

Link Asset Services suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows:

Average earnings in each year	
2023/24	4.4%
2024/25	3.3%
2025/26	2.6%
2026/27	2.5%
Long term later years	2.8%

Investment treasury indicator and limit - total principal funds invested for greater than 364 days. These limits are set with regard to the Authority's liquidity requirements and to reduce the need for early sale of an investment, and are based on the availability of funds after each year-end.

The Authority is asked to approve the treasury indicator and limit: -

Maximum principal sums invested > 365 days			
£m	2023/24	2024/25	2025/26
Principal sums invested > 365 days	£25m	£25m	£25m

- 4.5 Investment Risk Benchmarking** - These benchmarks are simple guides to maximum risk, so they may be breached from time to time, depending on movements in interest rates and counterparty criteria. The purpose of the benchmark is that officers will monitor the current and trend position and amend the operational strategy to manage risk as conditions change. Any breach of the benchmarks will be reported, with supporting reasons in the Mid-Year or Annual Report.

Security - The Authority's maximum security risk benchmark for the current portfolio, when compared to these historic default tables, is:

- 0.03% historic risk of default when compared to the whole portfolio.

Liquidity – in respect of this area the Authority seeks to maintain:

- Liquid short-term deposits of at least £20m available with a week's notice.
- Weighted Average Life benchmark is expected to be 0.25 years, with a maximum of 1.0 years.

Yield – local measures of yield benchmarks are:

- Investments – internal returns above the average SONIA (Sterling Overnight Index Average) rate.

And in addition, that the security benchmark for each individual year is:

	1 year	2 years	3 years	4 years	5 years
Maximum	0.03%	0.12%	0.10%	0.08%	0.06%

Note: This benchmark is an average risk of default measure and would not constitute an expectation of loss against a particular investment.

4.6 End of year investment report. At the end of the financial year, the Authority will report on its investment activity as part of its Annual Treasury Report.

APPENDIX F1**Interest Rate Forecast 2022 – 2025**

Link Group Interest Rate View 19.12.22													
	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25	Jun-25	Sep-25	Dec-25

**TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND
COUNTERPARTY RISK MANAGEMENT**

The DLUHC issued Investment Guidance in 2018, and this forms the structure of the Authority's policy below. These guidelines do not apply to either trust funds or pension funds which operate under a different regulatory regime.

The key intention of the Guidance is to maintain the current requirement for Authorities to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective, the guidance requires this Authority to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. This Authority has adopted the Code and will continue to apply its principles to all investment activity. In accordance with the Code, the Treasurer has produced its Treasury Management Practices (TMPs). This part, TMP1, covering investment counterparty policy requires approval each year.

Annual Investment Strategy – The key requirements of both the Code and the investment guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of following:

- The strategy guidelines for choosing and placing investments, particularly non-specified investments.
- The principles to be used to determine the maximum periods for which funds can be committed.
- Specified investments that the Authority will use. These are high security (i.e. high credit rating, although this is defined by the Authority, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- Non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the Authority is:

Strategy Guidelines – The main strategy guidelines are contained in the body of the treasury strategy statement.

Specified Investments – These investments are sterling investments of not more than one-year maturity, or those which could be for a longer period but where the Authority has the right to be repaid within 12 months if it wishes. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments which would not be defined as capital expenditure with:

1. The UK Government (such as the Debt Management Account deposit facility, UK Treasury Bills or a Gilt with less than one year to maturity).
2. Supranational bonds of less than one year's duration.
3. A local authority, housing association, parish Authority, CCLA or community Authority.
4. Pooled investment vehicles (such as money market funds) that have been awarded a high credit rating by a credit rating agency.
5. A body that is considered of a high credit quality (such as a bank or building society).

For category 5 this covers bodies with a minimum short-term rating of AA (or the equivalent) as rated by Standard and Poor's, Moody's or Fitch rating agencies. Within these bodies, and in accordance with the Code, the Authority has set additional criteria to set the time and amount of monies which will be invested in these bodies. This criteria is as per the "Investment Counter Party and Liquidity Framework".

Non-Specified Investments – Non-specified investments are any other type of investment (i.e. not defined as Specified above). The identification and rationale supporting the selection of these other investments and the maximum limits to be applied are set out below. Non-specified investments would include any sterling investments with:

	Non-Specified Investment Category	Limit (£ or %)
a	<p>Supranational Bonds greater than 1 year to maturity</p> <p>(a) Multilateral development bank bonds - These are bonds defined as an international financial institution having as one of its objects economic development, either generally or in any region of the world (e.g. European Reconstruction and Development Bank etc.).</p> <p>(b) A financial institution that is guaranteed by the United Kingdom Government (e.g. National Rail)</p> <p>The security of interest and principal on maturity is on a par with the Government and so very secure. These bonds usually provide returns above equivalent gilt-edged securities. However, the value of the bond may rise or fall before maturity and losses may accrue if the bond is sold before maturity.</p>	<p>30%</p> <p>AAA long term ratings</p>
b	<p>Gilt edged securities with a maturity of greater than one year. These are Government bonds and so provide the highest security of interest and the repayment of principal on maturity. Similar to category (a) above, the value of the bond may rise or fall before maturity and losses may accrue if the bond is sold before maturity.</p>	30%
c	<p>The Authority's own banker if it fails to meet the basic credit criteria. In this instance balances will be minimised as far as is possible.</p>	20%
d	<p>Building societies not meeting the basic security requirements under the specified investments. The operation of some building societies does not require a credit rating, although in every other respect the security of the society would match similarly sized societies with ratings. The Authority may use such building societies which were originally considered Eligible Institutions.</p>	20%
e	<p>Any bank or building society that has a minimum long-term credit rating of AA-, for deposits with a maturity of greater than one year</p>	3 years and £30m

The Monitoring of Investment Counterparties – The credit rating of counterparties will be monitored regularly. The Authority receives credit rating information (changes, rating watches and rating outlooks) from the Link Group as and when ratings change, and counterparties are checked promptly. On occasion ratings may be downgraded when an investment has already been made. The criteria used are such that a minor downgrading should not affect the full receipt of the principal and interest. Any counterparty failing to meet the criteria will be removed from the list immediately, and if required new counterparties which meet the criteria will be added to the list.

WEST MIDLANDS FIRE AND RESCUE AUTHORITY**PRUDENTIAL INDICATORS**

1. The actual capital expenditure that was incurred in 2021/22 and the estimates of capital expenditure to be incurred for the current and future years that are recommended for approval are:

2021/22 £000 Actual	2022/23 £000 Estimate	2023/24 £000 Estimate	2024/25 £000 Estimate	2025/26 £000 Estimate
3,189	3,333	9,191	6,255	4,377

2. Estimates of the ratio of financing costs to net revenue stream for the current and future years, and the actual figures for 2021/22 are:

2021/22 % Actual	2022/23 % Estimate	2023/24 % Estimate	2024/25 % Estimate	2025/26 % Estimate
2.56	2.04	1.82	1.81	1.55

The estimates of financing costs include current commitments and the proposals in this budget report.

3. All borrowing forecasts contained within this report relate only to supported capital expenditure, which receives Government grant support. Consequently, the incremental impact of any borrowing arising from new capital investment decisions has been reflected within the overall budget projections, although the impact specifically on the level of precept cannot be quantified.
4. Estimates of the end of year capital financing requirement for the Authority for the current and future years and the actual financing requirements at 31 March 2022 are:

31/03/22 £000 Actual	31/03/23 £000 Estimate	31/03/24 £000 Estimate	31/03/25 £000 Estimate	31/03/26 £000 Estimate
34,327	33,271	32,149	30,953	29,955

5. The capital financing requirement measures the Authority's underlying need to borrow for a capital purpose. In accordance with best professional practice, West Midlands Fire & Rescue Authority does not associate borrowing with particular items or types of expenditure. The Authority relies upon Sandwell Metropolitan Borough Council to undertake its treasury management function, which has an integrated treasury management strategy and has adopted the CIPFA Code of Practice for Treasury Management in the Public Service. West Midlands Fire & Rescue Authority has, at any point in time, a number of cash flows both positive and negative and Sandwell Metropolitan Borough Council manages its treasury position in terms of its borrowings and investments in accordance with its approved treasury management strategy and practices. In day to day cash management, no distinction can be made between revenue cash and capital cash. External borrowing arises as a consequence of all the financial transactions of the Authority and not simply those arising from capital spending. In contrast, the capital financing requirement reflects the Authority's underlying need to borrow for a capital purpose.
6. CIPFA's Prudential Code for Capital Finance in Local Authorities includes the following as a key indicator of prudence.

"In order to ensure that over the medium-term net borrowing will only be for a capital purpose, the local authority should ensure that net external borrowing does not, except in the short term, exceed the total of capital financing requirement in the preceding year plus the estimates of any additional capital financing requirement for the current and next two financial years."

The Authority had no difficulty meeting this requirement in 2021/22, nor are any difficulties envisaged for the current or future years. This view takes into account current commitments, existing plans, and the proposals in this budget report.

7. In respect of its external debt, it is recommended that the Authority approves the following authorised limits for its total external debt gross of investments for the next three financial years and agrees the continuation of the previously agreed limit for the current year since no change to this is necessary.

2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000	2025/26 £000
42,000	40,000	39,000	38,000	36,000

8. These authorised limits are consistent with the Authority's current commitments, existing plans and the proposals in this budget report for capital expenditure and financing and with approved treasury management policy statement and practices. They are based on the estimate of most likely, prudent but not worst case scenario, with in addition sufficient headroom over and above this to allow for operational management, for example unusual cash movements. Risk analysis and risk management strategies have been taken into account; as have plans for capital expenditure, estimates of the capital financing requirement and estimates of cash flow requirements for all purposes.
9. The Authority is also asked to approve the following operational boundary for external debt for the same time period. The proposed operational boundary for external debt is based on the same estimates as the authorised limit but reflects directly the estimate of the most likely, prudent but not worst case scenario, without the additional headroom included within the authorised limit to allow for example for unusual cash movement, and equates to the maximum of external debt projected by this estimate. The operational boundary represents a key management tool for in year monitoring.

2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000	2025/26 £000
38,000	37,000	36,000	35,000	33,000

10. The Authority's actual borrowing at 31 March 2022 was £31.5m. It should be noted that actual long-term liabilities are not directly comparable to the authorised limit and operational boundary, since the actual long-term liabilities reflects the position at one point in time.
11. In taking its decisions on this budget report, the Authority is asked to note that the authorised limit determined for 2022/2023 (see paragraph 7 above) will be the statutory limit determined under section 3(1) of the Local Government Act 2003.

APPENDIX H

WEST MIDLANDS FIRE AND RESCUE AUTHORITY

NET EXPENDITURE BUDGET FORECAST 2024/2025 TO 2025/2026

	Budget 2024/25	Budget 2025/26
Subjective Heading	£000s	£000s
Employees	108,500	111,500
Premises	7,700	7,800
Transport	2,200	2,300
Supplies & Services	9,800	10,000
Capital Financing	7,900	7,900
Income	(10,100)	(10,100)
Appropriations	(5,500)	(5,500)
NET EXPENDITURE	120,500	123,900
Available Funding	120,500	123,900
Surplus/(Deficit)	-	-

Note

Budget forecast for 2024/25 and 2025/26 assume:

- A Council Tax increase of 3% in 2024/25 and 2025/26.
- Inflation assumptions as shown on Appendix H2.
- Continuation of Section 31 government grant to fund employer's firefighter pension contribution increase.

WEST MIDLANDS FIRE AND RESCUE AUTHORITY

INFLATION ASSUMPTIONS

Pay Awards:		%

	April 24	2.0
	April 25	2.0

APPENDIX H3

WEST MIDLANDS FIRE AND RESCUE AUTHORITY

SENSITIVITY ANALYSIS

The approximate annual impact of a 1% variation in some of the key assumptions underpinning the budget projections is shown below:

Expenditure

Uniformed pay awards	£800k (£600k part year)
Employers Firefighters Pension Contribution	£460k
Interest payable	£305k
Non-uniformed pay award	£170k
General inflation	£85k
Energy costs	£22k
Fuel	£11k

Income

Core Funding	£570k
Council Tax	£540k
Interest receivable	£390k

WEST MIDLANDS FIRE AND RESCUE AUTHORITY**SCENARIO ANALYSIS**

In the Secretary of State for DLUHC provisional settlement announcement in December 2022 for 2023/24, there was no indication of further funding levels beyond 2023/24. In planning for 2024/25 onwards, a year-on-year increase of 2% has been assumed in 2024/25 and 2025/26 to the core funding. However, it is recognised that funding may be at a higher or lower level than this. For illustration, the impact of a 4% increase or 2% decrease to the core funding is shown below in the following Tables.

Core Funding Increases/Reductions

Financial Year	£ Core Funding	% Increase/ (Reduction)	£ Increase/ (Reduction)
2015/16	61,943,000		
2016/17	58,665,000	-5.3%	-3,278,000
2017/18	54,703,000	-6.8%	-3,962,000
2018/19	53,030,000	-3.1%	-1,673,000
2019/20	52,048,000	-1.9%	-982,000
2020/21	52,896,000	+1.6%	+848,000
2021/22	53,002,000	+0.2%	+106,000
2022/23	53,590,000	+1.1%	+588,000
2023/24	56,867,000	+6.1%	+3,277,000
2024/25	58,004,000	+2.0%	+1,137,000

2025/26	59,164,000	+2.0%	+1,160,000
---------	------------	-------	------------

Core Funding increase of 4% in 2024/25 and 2025/26

Financial Year	£ Core Funding	% Increase/ (Reduction)	£ Increase/ (Reduction)
2023/24	56,867,000		
2024/25	59,142,000	+4.0%	+2,275,000
2025/26	61,508,000	+4.0%	+2,366,000

Core Funding Reduction of 2% in 2023/24 and 2024/25

Financial Year	£ Core Funding	% Increase/ (Reduction)	£ Increase/ (Reduction)
2023/24	56,867,000		
2024/25	55,730,000	-2.0%	-1,137,000
2025/26	54,615,000	-2.0%	-1,115,000

A 1% movement in 2023/24 core funding equates to approximately £570k.
